

Biodiversity Team Leader, FFI Vietnam Programme, Asia-Pacific

“In the past century FFI has consistently saved species from extinction and protected habitats from destruction. Their solutions have always been practical, efficient and sustainable in local circumstances.”

Sir David Attenborough,
FFI Vice-president

Fauna & Flora International

Fauna & Flora International (FFI) saves species from extinction and habitats from destruction, while improving the livelihoods of local people. Our guiding principles are to work with and alongside local partnerships, act as a catalyst for change, make conservation relevant, and base decisions on sound science. Founded in 1903, FFI is the world's longest established international conservation body; our conservation work, and impact, spans the globe.

Asia Pacific Programme

Working closely with local partners, the Asia-Pacific Programme currently includes a broad range of species and landscape targeted conservation initiatives in Vietnam, Indonesia, Cambodia and Myanmar, and has country programme offices in Phnom Penh, Jakarta, Hanoi and Yangon. Around 70 projects are being implemented in the region by a team of approximately 200 staff, consultants, volunteers and partner organisations with an annual regional budget of approximately USD 10 million.

Vietnam Programme

Vietnam supports a rich variety of wildlife and habitats, some of which is rare and found nowhere else in the world. Despite its relatively small size, Vietnam is the 16th most biodiverse nation on Earth. Vietnam's natural world includes some of the highest diversity of primates (apes and monkeys) in the world, with an incredible 25 species. Vietnam is also a global hotspot for plant, amphibian, reptile and bird richness and endemism.

The FFI Vietnam Programme, established in 1997, is at the forefront of conserving this unique and threatened wildlife and we have experienced some significant successes especially in the recovery of primate populations. Our programme includes a focus on: species conservation; strengthening the protected area network and improving management effectiveness; conservation and connectivity at the landscape scale; supporting the wellbeing of local communities and enabling community-based conservation approaches, placing local stakeholders at the forefront of forest management, protection and monitoring; addressing illegal and unsustainable wildlife trade, and conservation of marine biodiversity.

The Opportunity

FFI is seeking a Biodiversity Team Leader to provide technical support across the FFI Vietnam Country Programme. As a Biodiversity Team Leader, you will be a highly experienced conservation professional, and able to take responsibility for the design and implementation of biodiversity surveys and monitoring, including analysis, data management and reporting.

You will have a strong proven track record in the delivery of technical reports and scientific publications, and provide technical input to programme development and proposal writing. You will be skilled in providing technical advice and input to the design, development, implementation and

monitoring and evaluation of conservation outcomes.

Terms and Conditions

Start Date:	As soon as possible

Job Description

Job Title:	Biodiversity Team Leader, FFI Vietnam Country Programme
Reporting to:	Country Director, FFI Vietnam Country Programme
Line Manager of:	The incumbent will supervise Biodiversity Officer(s) and Assistant(s) of the FFI, Vietnam Programme, under the direction and supervision of the Country Director
Key Internal Relationships:	Country Programme Manager, FFI Vietnam Programme Projects Managers Vietnam Finance Manager and Finance Team Technical and Communications staff
Working with:	Project teams; routinely liaise with local government agencies, local communities and community-based organisations, partner NGOs, and national and international academic partners, representing the values and interests of FFI at all times.
Purpose:	The purpose of the Biodiversity Team Leader is a full-time position to provide the technical inputs to

the highest possible standards into our primate conservation and protected area development areas of work, which focus on wildlife crime prevention (protection), species research, biodiversity baseline surveys and biological monitoring.

Specific Duties: Under the supervision of the Country Director, working in close collaboration and coordination with the Project Managers and the Country Programme Manager, liaising closely with the Senior Technical Specialist, the Biodiversity Team Leader leads on biodiversity-related activities with the following duties:

Technical Input

- Work with Senior Technical Specialist to design methods/approach for any biodiversity surveys, census, research and monitoring;
- Work with Senior Technical Specialist to develop biodiversity monitoring routes, protocols, datasheets/table-based systems, and manage databases;
- Provide training for Community Conservation Team (CCT) members and / or Biodiversity Monitoring Team members and / or Gibbon Monitoring Team members on biodiversity/species monitoring to improve data collection and analysis and management of data;
- Lead on field work of surveys, including primate surveys/censuses, biodiversity surveys, habitat assessments/research, species ecology research;
- Work with the Project Managers/Leads and / or technical staff of protected areas/national parks/Forest Protection Department (FPD) to provide summary reports on biodiversity/species monitoring, including recommendations to improve quality of monitoring and support law enforcement;
- Author technical reports (based on the above), and scientific papers (where possible).

Programme Development & Reporting

- Drawing from field experience and data (which the Team Leader will manage), support the development of new concepts and funding proposals, to fund programme activities.
- Input to support the development of high-quality donor reports

Operational

- Maintain good working relations with FFI's governmental partners at all levels including provincial, district, commune and community partners and other NGOs/INGOs working at project sites;
- Work with FFI project staff and local partners to identify data / research and conservation needs, set priorities, and then plan and implement field activities;
- Support project managers to understand and meet targets, in terms of project research (data needs) and monitoring, and its use for supporting improved forest protection, biodiversity conservation and protected area/forest management;
- Provide Mission Term of References (MTOR) before and Back to the Office Reports (BTOR) after every field trip;
- Review and approve Mission Term of References (MTOR) before and Back to the Office Reports (BTOR) after every field trip of line managed staff;
- Provide regular reports on biodiversity monitoring activities;
- Provide logistical, technical and capacity building support to project partners, as appropriate;
- Work with partners and through coordination of consultants, ensure activities are well implemented and in accordance with high environmental and conservation standards;
- Support field visits and field work by visitors (e.g. FFI UK staff or donors), advisors and consultants;
- Provide additional support to the project activities where required to ensure implementation continues to meet conservation goals at all project sites, in particular the following:
 - Help translate documents between English and Vietnamese when requested by line manager;

- Provide logistical support for specific activities in Hanoi when requested by line manager;
- Representation of FFI in advocating biodiversity conservation policy forum.

Partnership Development

- Proactively identify, and where asked, help to develop and nurture relationships and partnerships with third parties, including local government agencies, local communities and community-based organisations, partner NGOs etc.

Programme Representation

- Where asked, represent FFI at key fora, including conferences, consultations, negotiations, meetings, workshops, briefings and in working groups, improving the visibility of FFI's work in Vietnam and elsewhere

Communications

- Bring to the attention of the Country Director any news-worthy items arising within the country programme
- Provide support to the production of high-quality public reports and journal articles on FFI's work in Vietnam
- Provide editorial review and input to the creation of awareness / PR materials and communication outputs (website text, blogs, social media posts, etc.) to the communication staff (UK and VN)

How to Apply

Applications, consisting of a covering letter, a full CV and contact details for two referees (who will not be approached without your permission), should be sent electronically to Ms. Le Hong Viet at viet.hong.le@fauna-flora.org

In your cover letter, please explain why you feel you should be considered for this post, highlighting your relevant skills, knowledge and experience and how they meet the requirements of the role profile.

Please mark your application '**Biodiversity Team Leader, FFI Vietnam Programme**'.

The closing date for applications is **3rd April 2023**. Interviews will be held during the following week.

Candidates selected for interview will be contacted by email or telephone. Please specify your preferred method of contact in your covering letter and indicate where you saw the position advertised.

No agencies please.

Regrettably, due to limited resources and the high number of applications we receive, we are only able to contact short-listed candidates. If you do not hear from us within four weeks of the closing date, please assume that you have not been successful on this occasion.

Applicants with Disabilities

FFI encourages applications from individuals with a disability who are able to carry out the duties of the post. If you have special needs in relation to your application, please contact Le Hong Viet, Admin Officer, FFI, on Tel: +84 (0) 243 7194183 or Email: viet.hong.le@fauna-flora.org

FFI values diversity and is committed to equality of opportunity
