

International Rice Research Institute - Vietnam Office

Senior Associate Scientist I - Biotechnology / Biochemistry

About IRRI

The International Rice Research Institute (IRRI) is the world's premier research organization dedicated to reducing poverty and hunger through rice science; improving the health and welfare of rice farmers and consumers; and protecting the rice-growing environment for future generations. IRRI is an independent, nonprofit, research and educational institute, founded in 1960 by the Ford and Rockefeller foundations with support from the Philippine government. The institute, headquartered in Los Baños, Philippines, has offices in 17 rice-growing countries in Asia and Africa, and over 1,000 staff.

Working with in-country partners, IRRI develops advanced rice varieties that yield more grain and better withstand pests and disease as well as flooding, drought, and other harmful effects of climate change.

Job Purpose

Under the supervision of the group scientist, this position will provide engineering and electrical technical support that will contribute to the provision and maintenance of research facilities and specialist instrumentation within the C4 Rice Centre. Our mission is to design, build and make available advanced research tools that assist IRRI's scientist study and probe plant function. Our vision is to make IRRI a world leader in plant phenomics, offering service-based solutions to scientists who require high-resolution, high-throughput physiology measurements.

Working with in-country partners, IRRI develops advanced rice varieties that yield more grain and better withstand pests and disease as well as flooding, drought, and other harmful effects of climate change.

This position will be recruited for assisting the management of the new Taiwan ICDF Cabin project. In addition, s/he will assist the data collection for the USDA-Feright and USAID – CRM projects. The objective of Capacity Building for Sustainable and Low-carbon Rice Innovations in Southeast Asia project (Cabin) is to enhance knowledge, capacity, and accelerate the sustainable low carbon rice production. This project includes five countries: Cambodia, Indonesia, Laos, Philippines, and Vietnam.

This position will be based at the IRRI Vietnam Office and may only be filled by permanent citizens of Vietnam.

Roles and Responsibilities

- Assist the project leader for the CABIN project management, M&E, and report.
- Support monitoring and collecting data for the related experiments, field trials, and demonstrations under the related projects.
- Coordinate with required IRRI services and supplies to ensure smooth implementation of experiments.
- Contribute to the writing of manuscripts for reports/publications as well as presentations/posters for national and international conferences.
- Assist in monitoring and evaluating research activities/tasks performed by research technicians and contract workers; provide guidance when necessary.
- Assist to develop and translate (Vietnamese – English) guidelines, training materials on and provide capacity building for the related technologies/ practices e.g. sustainable rice production, rice straw composting, etc.

Qualifications

- Bachelor's Degree in Agronomy or related field
- Minimum 4 years relevant work experience

Skills Required

Mandatory

- Good skills in MS Office

- Experience in data collection for analysis and report writing
- Proficiency in written and spoken English

Preferred

- Has experience in project management, organization/ facilitation of the science workshop, farmer field days, and capacity building
