Monitoring & Evaluation For Learning

How to best capture the real changes that come into effect through our development interventions? Which methods ensure accountability and learning? How to empower organisations, development practitioners and partners with monitoring and evaluation information? Learn to improve your MEL practices and choose the most appropriate tools for tracking both quantitative and qualitative changes.

Course highlights

- Outputs, outcomes and impacts
- Need-based M&E information
- Key Performance Indicators
- Progress Markers (Outcome Mapping)
- Monitoring risks and organisations
- Data collection, analysis and reporting
- Evaluation process
- Most Significant Change
- Impact Evaluation
- Learning from M&E in organisations

Course objectives

At the end of this course you:

- know how to effectively monitor and evaluate projects, programmes and organisations;
- know which information you need to understand the context and manage both results (outputs, outcome, impact) and organisational performance;
- can collect, analyse, process and present this information;
- can turn monitoring and evaluation into (participative) learning;

- can design and steer evaluations to contribute to accountability and stimulate learning by all stakeholders.

For whom?

This course is highly relevant if you are:

- participating in formulating, managing or monitoring development interventions;
- preparing, supervising, using or participating in evaluations;
- keen to improve your M&E skills or the practices of a national or local government, an international donor agency or a non-governmental organisation.

Period

02 Jun 2014 / 05 Jun 2014
