

INVITATION LETTER

Pollution, energy scarcity, global warming... many people think these issues are out of their world. Perhaps only superman or a miracle can solve these challenges.

But there is always **a village of active citizens!**

It is a place where people live in harmony with nature; where children learn and love the environment, where trash is a resources, solar energy is used to power light bulbs and computers, where vegetables are clean, where there are stories of friendship... and where every citizen is responsible for every tiniest action!

Do you want to live in such a village? Come together, come together – the village is calling for active citizens! Together, let's think, act and spread positive change!

Do you want to join?

Let's register for the

Vietnamese Youths and Sustainable Development Summit (VYS) 2014

Theme: **"Be Active Citizens"**

This is a nation-wide event organized by Green Generation network with sponsorship from the British Council in Vietnam and support from the Center of Live&Learn for Environment and Community (Live&Learn), WWF, Vietnam Environment Administration and other organizations. The program was started in 2009 and since then has inspired and connected Vietnamese youths with the environment and sustainable development.

VYS 2014 is a chance to:

- Be AWARE comprehensively of environment, energy and sustainable development themes;
- Take ACTION more effectively in youth's initiatives;
- SPREAD ideas and resources for youths in environment, energy, climate change and other sustainable development themes.
