24 July 2017

Dear Sir or Madam,

Subject: Consultation Meeting on Proposed Project “Enabling Greenhouse Gas Emission Mitigation Initiatives in the Chemical Fertilizer Industry in Viet Nam”

The United Nations Development Programme (UNDP) has been in collaboration with Ministry of Industry and Trade (MOIT) and businesses in chemical fertilizer sector to develop a project proposal “Enabling Greenhouse Gas Emission Mitigation Initiatives in the Chemical Fertilizer Industry in Viet Nam” to mobilize funding from the Green Climate Fund (GCF).

The project will aim at reducing GHG emission in the sector through strengthening policy and institutional framework; capacity building for the whole sub-sector, and implementing physical interventions in 3 host facilities (Lam Thao Fertilizers and Chemicals Joint-stock Company-LAFCHEMCO, Van Dien Fused Magnesium Phosphate Fertilizer Joint Stock Company-VAFCO and PetroVietnam Ca Mau Fertilizer Joint Stock Company-PVCFC).

In order to finalize the proposal, UNDP will organize a consultation meeting to present the project details and consult with relevant stakeholders on potential social and environmental impacts of the project. Based on the consultation, an environmental and social management framework will be developed to address potential impacts with engagement of all relevant stakeholders during future project implementation.

We would like to kindly invite you to participate in and contribute to this consultation meeting which will take place on:

Time: 14:00 – 16:00, Thursday 27 July 2017

Venue: C2, Green One UN House, 304 Kim Mã, Hà Nội

For further details and registration, please contact UNDP by email at vu.thi.thu.hang@undp.org or Tel at 024.38500138 or 0912116218.

Yours sincerely,
