Insights of Webinar

A consultation was conducted from August 2019 to January 2020, with a total of 9,681 children and youth from over 12 countries voicing out their views and opinions on climate crisis. These boys, girls and youth participated through on-line surveys and face-to-face workshops to give voice to their concerns for the well-being of the planet.

The webinar will provide a platform for representatives of governments, UN agencies, INGOs to hear children and youth voices in the report findings and directly from child and youth representatives attending this webinar. We will be inviting child and youth representatives to speak on their personal experiences of facing climate disasters and have a conversation with adults on actions to protect the planet from climate crisis and disaster risks.
