

To: .....

The Chemical Industry with all related value chains has enormous potentials for contributing to climate protection. The transformation of the chemical industry and related value chains with a focus on sustainable, low-emission processes and products is a huge challenge that requires enormous efforts and high levels of innovation, considering innovation as a driver of low-carbon solutions.

To get an overview of the Chemistry sector in Vietnam, its response toward climate change and related best practice examples, GIZ Vietnam, under the framework of "Climate Action Programme for the Chemical Industry" (CAPCI) project, in cooperation with Chemical Society of Vietnam would like to invite you to participate at our

**Dialogue Forum on Chemistry and Climate Change - The Role of the Chemical Industry for Tackling Climate Protection**

Time: 14.00-17.30 pm, 19 January, 2022

Venue: Virtually on Microsoft Team

Languages: English and Vietnamese (with simultaneous translation)

Please find the attached Agenda for further information.

Please confirm your participation or if you have any inquiries, please contact us at:
