

EMPLOYMENT OPPORTUNITIES IN PUBLIC HEALTH

FHI 360 is a non-governmental organization that works with the Vietnam Ministry of Health, other ministries, provincial health services, and local non-government organizations to promote the health and well-being of the Vietnamese population, particularly vulnerable and disenfranchised groups. In Vietnam, FHI 360 is currently building the capacity of local organizations in HIV prevention, care, and treatment; TB control; nutrition; maternal and child health; dengue control; behavioral and epidemiologic research methods training; clinical research in new vaccines and drugs; and laboratory strengthening.

We are looking for a highly qualified candidate who has significant experience and capabilities in the burgeoning field of health informatics to serve as **(Senior) Technical Officer, Health Informatics** in our Strategic Information unit, based in **Hanoi**.

Position requirements

FHI 360 seeks to support government of Vietnam health facilities in building or improving health information systems that would strengthen the management of HIV patients enrolled in care and treatment. The candidate would be responsible for building health informatics systems that would facilitate the following:

1. Improved data gathering and real time reporting
2. Improved data management that might integrate mobile systems and geographic information systems (GIS)
3. Rapid data analysis and interpretation
4. Collection of in-depth HIV patient data (CD4 counts, viral load), and health facility service quality and performance data

Informatics platforms might incorporate electronic data warehouses such as district health information software (DHIS), mobile applications, GIS, and electronic medical records systems (OpenMRS, etc.). The candidate must also be familiar with health data systems and flow at a systems level. The candidate would help to create a real-time data use culture in health facilities to inform programmatic decisions.

Main duties and responsibilities:

- Evaluate and develop appropriate health informatics systems to support the management of HIV patients in district-level health facilities
- Develop customized informatics software packages as appropriate, working with select vendors as needed, and conduct trials to demonstrate applicability and value
- Facilitate informatics training programs for designated health facility staff
- Support the FHI 360 strategic information in reviewing current data systems and making recommendations for improvements

The successful candidate will have the following qualifications and abilities:

- Bachelor's degree in relevant field. Master's Degree or its international equivalent preferred

- A vision and strong knowledge of different technology platforms such as innovative mobile platforms, electronic medical records, and real-time reporting tools, and demonstrated experience in implementing such platforms
- Demonstrated informatics programming skills
- Understanding of health program indicators, data needs, and performance measurement
- An ability to communicate ideas clearly

Interested candidates should send a CV with cover letter, and certificates in English, **by December 15, 2015** to:
