

# Results - Based Project Management

9 - 12 July 2019 | Yangon - Myanmar

## **MANAGING LASTING RESULTS IN THE NEW REALITY OF INTERNATIONAL COOPERATION**

"The shift from the logical framework to theory of change has already been adopted by my organisation. MDF Training & Consultancy has both practical experience and the course contents to guide us."

## WHY THIS COURSE?

During the last decade, results-based management (RBM) has gained much influence in planning programmes for social impact. Still many organisations struggle to plan for real, impactful results with the accompanying processes and tools. RBM has consequences for the entire organisation: for project planning, monitoring, evaluation and learning. Learning how to design a solid RBM framework - in various forms – is a good first step to integrate RBM in your organisation and programmes

## COURSE OBJECTIVES

- Learn RBM in a changing context (e.g. SDGs, private sector involvement, conflict situations)
- Learn various methods for designing results (for example: Theory of Change, Stakeholder Analysis, Appreciative Inquiry, Outcome Mapping)
- Get insights in different RBM frameworks (e.g. Results Framework, Outcome Strategy Map)
- Learn how to design a results-based monitoring & evaluation plan, including KPI's (key performance indicators) and progress markers

## WHO SHOULD JOIN?

Staff of organisations involved in projects and programmes with a social impact (NGO's, private sector organisations, UN organisations, governments), who need to master RBM concepts and tools. You want to effectively manage results-oriented projects and programmes in your own organisation or with partner organisations

## COURSE INFORMATION

- **Time:** 9 - 12 July 2019
- **Location:** Yangon, Myanmar
- **Registration deadline:** 1 July 2019
